

CULTURAL RESOURCE SERVICES

SOUND SCIENCE AND CREATIVE SOLUTIONS

SWCA Environmental Consultants (SWCA) is one of the *leading providers of cultural resources services* in the nation. We specialize in all aspects of cultural resources management (CRM), including archaeology, architectural history, historic preservation, cultural resources compliance monitoring, and tribal consultation/ethnography—all of which are largely driven by the National Historic Preservation Act (NHPA).

SWCA's team of subject matter experts, principal investigators, and cultural resources specialists have local, technical expertise and established, strong relationships throughout the South. Along with our regional experience, SWCA has a national team of *more than 460 cultural resources professionals*, including Registered Professional Archaeologists (RPAs) who meet the Secretary of the Interior's Standards for Archaeology and Historic Preservation and Architectural Historians.

Our subject matter experts routinely engage in agency and tribal consultation, critical issues analysis, archival research and development of research designs, predictive modeling to streamline field surveys, all levels of field studies (i.e., reconnaissance, survey, testing, and mitigation), and reporting and documentation that exceeds both the state's and the National Park Service's standards. Our Southeastern cultural resources staff have successfully completed these types of surveys in Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia.

We understand the specifics of the regulatory process in each state, which allows us to provide you with effective support and tailored guidance for your project needs.

SWCA NOTABLE CLIENTS

Department of Veterans Affairs; U.S. Coast Guard; U.S. Army Corps of Engineers; U.S. Navy; Army National Guard; National Park Service; U.S. Department of Agriculture; U.S. Forest Service; Natural Resources Conservation Service; Tennessee Valley Authority; Department of Transportation; local, county, and state agencies; private renewables generation and battery storage developers; telecommunication companies; and public utility companies.

SERVICES & CAPABILITIES
